

MOLD REPAIR USING SG5000

SG5000
METHACRYLATE ADHESIVE

▼ MIX & APPLY

▼ PREP & SAND

▼ PREP & GELCOAT

▼ SAND & POLISH

Fiberglass Mold Repair is Now Faster and Easier

With its rapid cure times, using SG5000 means repairs can be completed in hours, not days

SG5000 has been proven effective when used instead of glass patching in the repair of cracks and dings in fiberglass molds. It has also been shown to provide more durable repairs when compared to other, traditional patching and repair methods.

SG5000 BENEFITS

- Rapid cure (less than 4 hrs)
- Thin films cure hard & fast
- No tacky surfaces
- Sands easily & cleanly
- Packs easily without trapping air
- Less time to gelcoating
- Saves over 4 hours of labor
- Yields greater number of pulls

SG5000 TIME & LABOR SAVINGS

	SG5000 METHOD	LAMINATION METHOD	OTHER METHODS
Cure Time (to sanding)	Less than 4 hours	24 Hours	Less than 4 hours
Pulls Between Repairs	At least 4	Less than 3	Less than 2 (repair pulls out)

Get molds back into production within 8 hours
